

GREAT FOR:

- Heat sensitive fabrics
- Sublimated garments

Hotronix®

POWER PLATEN™

ELIMINATE SCORCHING - FOR GOOD

THE POWER IS IN THE PLATENS

Do more with your Heat Press. With 4 sizes of interchangeable platens, it will work for anything you decorate. The Power Platen is lightweight, with a quick release handle making it easier to change between your other platens. The Built in heat press pillow gives you a solid when press when dealing with zippers, buttons or seams.

STOP SCORCHING

Tackle delicate polyester blends with the heat from the lower platen. Applying heat directly beneath the heat transfer adhesive means a quicker bond between the adhesive and fabric. Further reducing the risk of scorching, and speeding up production.

Available in four sizes:

- 15 x 15 cm, Art.No: 163533
- 15 x 40 cm, Art.No: 163532
- 28 x 38 cm, Art.No: 163531
- 40 x 50 cm, Art.No: 163530
- Controller, Art. No: 163534
- Power Platen Set (all platens & one controller), Art.No. 163570

PRODUCT INFORMATION:

- Compatible with all Hotronix® Heat Presses*
- Requires the Power Platen Controller (sold separately)
- Controller with quick disconnect design allows you use one controller with different platen sizes
- Controller includes digital temperature display for accurate application
- Two-year-warranty
