GT-3 Series

Grow as your business grows!

**GT-3 is upgradeable
for your business style!**

Expand your business!

GT-3

The new GT-3 Series of digital garment printers is a line-up of three modular models allowing buyers to upgrade their model when their business grows.

This series of *three machines* offers a *CMYK-only printer* (GT-341), a *CMYK printer with two white print heads* (GT-361), and a *CMYK model with four white print heads* (GT-381) for higher speed and performance. A user can start with the CMYK-only unit (GT-341) and if he wants to add the white ink feature after a while, he can *easily upgrade* his existing model rather than having to buy a new machine.

Additional advanced features include:

- Up to *1200 dpi*, allowing photographic quality printing
- Up to *eight industrial and original Brother print heads* for faster throughput
- *One pass printing* with CMYK and white ink printed simultaneously for higher productivity
- *USB memory* stick compatibility to download designs without computer hookup
- *Ink cartridge system* designed to provide consistent high-quality printing
- *Compact size* for installation in versatile work places, e.g. storefronts or small locations
- *Simple user interface* without the need for RIP software
- Inks/Consumables certified by *Oeko-Tex Standard 100, Class 1*

Brother integrates their core technology and know-how into the new GT-3 Series of digital garment printers by manufacturing the printer and other critical components like *print heads, controller* and the *software all by themselves* - "Brother made".

Coupled with the new genuine Brother ink formulation this ensures a fully integrated system compared to that of many competitors. All in all this makes the new Brother GT-3 series of digital garment printers Brother's finest product line so far.

To learn more about the current Brother Garment Printers, or to find an authorized local dealer, please visit www.brother-industrial.com.

Create fashion and values:

Polo shirts
even over the button tab

Caps

T-shirts
Print on T-shirts of any colour without framing and with high quality.

Bags
Print on cotton and even on leather

Light blue Jeans
Print on any requested position

Shoes

Create fashion and values:

Sweat shirts
even over the zipper

Jackets

Aprons

Even other materials like carton, special -ceramic, -leather, wood, etc. is possible to print on, when the material can absorb the ink and withstand the heatpress.

Just give it a try!

Babyclothes

All Inks and Consumables are certified by Oeko-Tex Standard 100, Class 1

Platen Development and Service:

Cap Platen

Pocket Platen

Sleeve Platen

Shoe Platen

Zipper Platen

Hotel Slippers Platen

Individual Solutions

If your customer has a request for special applications like printing on shoes or caps, please share this information with us so that we can think about the easiest and fastest production together.
